THE PATH FORWARD

The impact of COVID-19 is not significant on the financial performance in Q4FY20 and the management assessment of the COVID-19 impact on the future outlook is premature since the contagion is still aggressive in India, not subsided even elsewhere in the world and there is already effect of recession on global economy.

SHRIMP CULTURE SCENARIO IN INDIA

- The management opines that, basing on the present shrimp culture situation in India, there may not be significant down fall in shrimp production in the country during the FY21, provided the impact of Covid-19 will not have severe impact on Global market for shrimps.

SHRIMP PROCESSING AND EXPORT MARKET POTENTIAL

- As per UB Index movement, the international prices of shrimp remained stable in FY20
- International prices for larger shrimps have improved in Q4FY20 when compared to Q4FY19 and are expected to continue

SHRIMP FEED

- Considering the current scenario in Shrimp culture in India, the Shrimp production and consequently feed consumption is estimated 9 lakhs tons in calendar year 2020 as compared to 10 Lakhs tons in calendar year 2019, de-growth of 10%. However the Company is confident of maintaining the present market share.
- Construction work of shrimp hatchery progressing. The commercial production is expected to commence in September 2020.

SHRIMP PROCESSING AND EXPORT

- Continued focus on export of Value added products is bearing results and also exploring opportunities in new markets.
