Consequently, any necessary changes in accounting policies have been implemented to ensure alignment of the accounts with IND-AS. Also, during the financial year 2024-25, the Company has changed its method of valuation of inventories in respect of gold from the First-In, First-Out (FIFO) method to the Weighted Average Cost method. The change has been made to better reflect the consumption pattern of inventories and to provide a more appropriate presentation of the cost of inventories in the financial statements. The Weighted Average Cost method is considered more reflective of the current business operations, where purchases and issues of inventories occur frequently and in varying quantities and prices.

The change in accounting policy has been implemented to present a more consistent and comparable measure of inventory costs and to align with industry practices. Management believes that this change will result in financial statements that provide more reliable and relevant information to users.

In accordance with Ind AS 8 on Accounting Policies, Changes in Accounting Estimates and Errors, this change in accounting policy has been applied retrospectively. The comparative figures for the previous year have been restated to reflect the new method of valuation.
